

What does the data tell us?

9.5 per 100,000
mortality rate from
accidental falls (127 deaths
over the period 2020-22)

5th lowest mortality rate in
Yorkshire and the Humber

This district had a **lower**
rate per 100,000 population
compared to England (12.3)
and the region (10.7)

8,933 (11.4%)
Estimated prevalence of
common mental disorders:
% of population aged 65 and
over

135.8 per 100,000
mortality rate from dementia
and Alzheimer's disease
(1732 deaths over the period
2020-22)

The district had a **higher** rate
compared to the England rate
of 113.7 and the regional rate of
119.1

42.6 per 100,000
mortality rate from influenza
and pneumonia (554 deaths
over the period 2020-22)
2nd highest mortality rate in
Yorkshire and the Humber

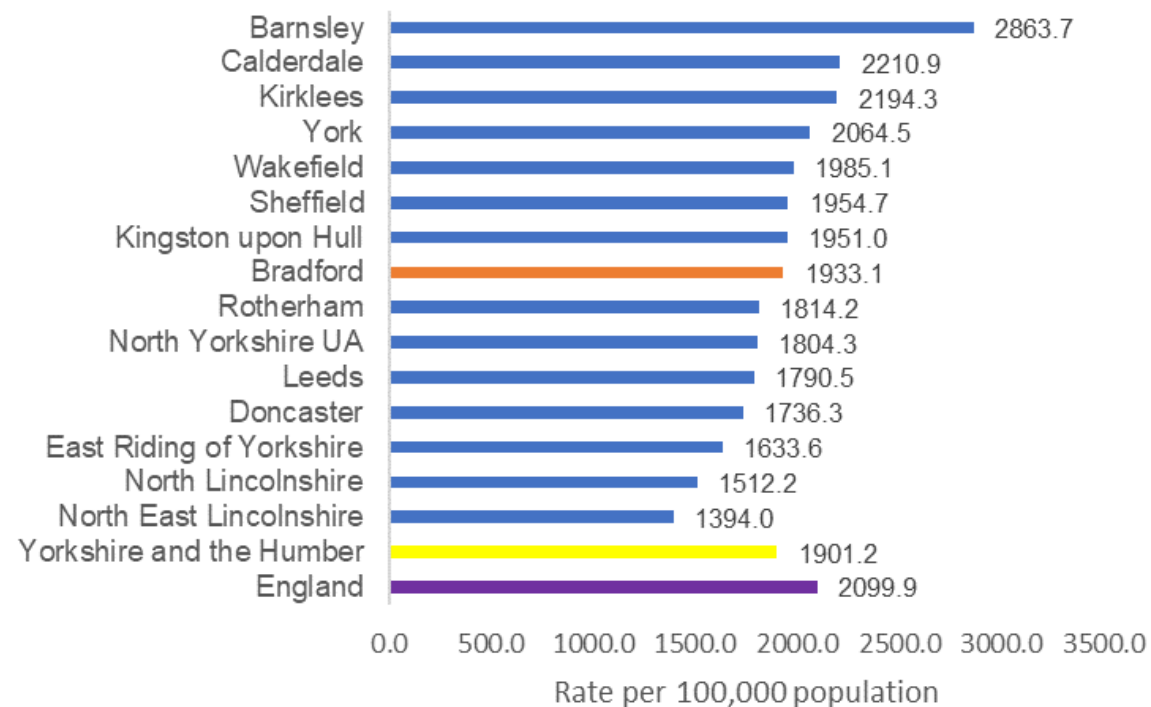

1,600 emergency
hospital admissions due
to falls aged 65 years and
over in 2021-22

1,050 were female with
550 male

The district had a **lower**
DSR rate per 100,000
population (1933) when
compared to the England
rate of 2100 per 100,000 but
higher than the regional rate
of 1901 per 100,000

Emergency hospital admissions due to falls in people aged 65 and over 2021-22

Emergency hospital admissions due to falls	Female			Male		
	Count	%	England	Count	%	England
65-79 years	305	19.1%	20.7%	225	14.1%	13.4%
80+ years	745	46.6%	44.7%	325	20.3%	21.1%
Total - Bradford	1600					

In 2021-22 there were 1600 emergency hospital admissions due to falls. Females aged 80 years had the highest proportion of emergency hospital admissions due to falls at 46.6% (745) with males 20.3%, the district is similar to the England average of 44.7%.

The district had the 8th lowest rate per 100,000 population for emergency hospital admissions due to falls in the region and lower than the England DSR rate of 2099.9. The regional average was lower than the district with 1901.2 per 100,000 population.

Data Source: [Public health profiles - OHID \(phe.org.uk\)](https://publichealthprofiles.org.uk)

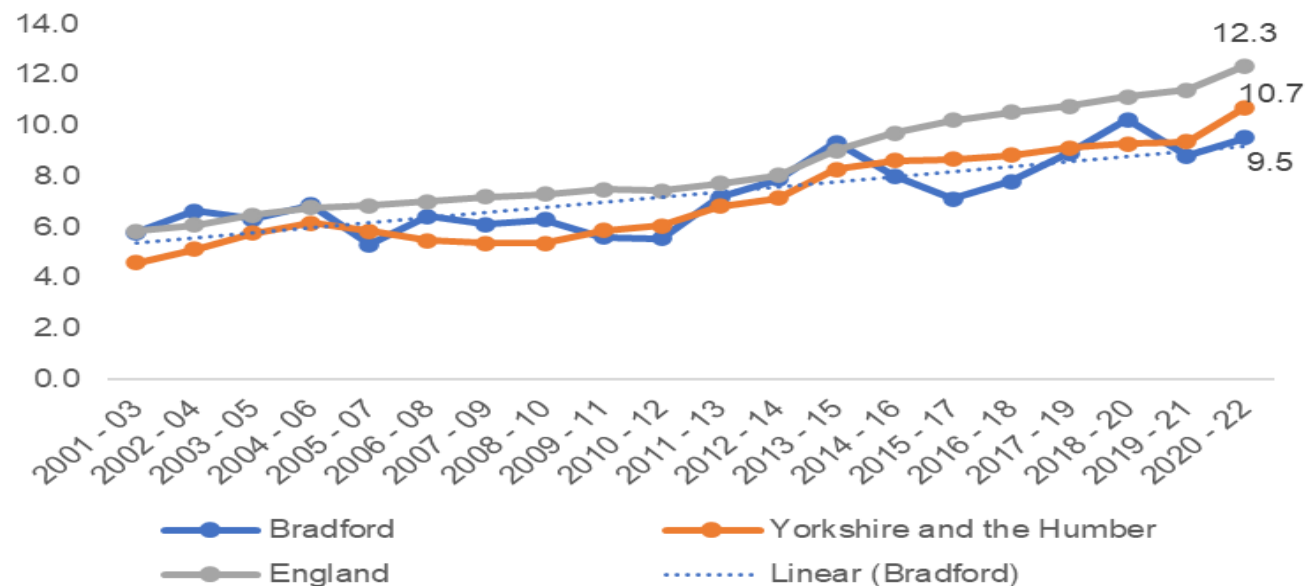

Mortality rate from accidental falls, all ages 2020-22

Mortality rate from accidental falls, all ages	Bradford			Region		England	
	Count	%	Rate	%	Rate	%	Rate
Female	51	40.2%	6.6	48.9%	9.0	49.2%	10.2
Male	76	59.8%	13.2	51.1%	13.1	50.8%	15.3
Total - Bradford	127						

Over the 3-year period the mortality rate from accidental falls (all ages) for Bradford was 9.5 per 100,000 (127 deaths over the period). The lowest reported mortality rate was in 2005-07 (5.3) and highest during 2018-20 (10.2).

Bradford had a higher mortality rate (13.2) and higher proportion of males when compared with females in the district and similar to regional rate for males (13.2). The district has a lower proportion and mortality rate when compared to both regionally and England.

Data Source: Public health profiles - OHID (phe.org.uk)

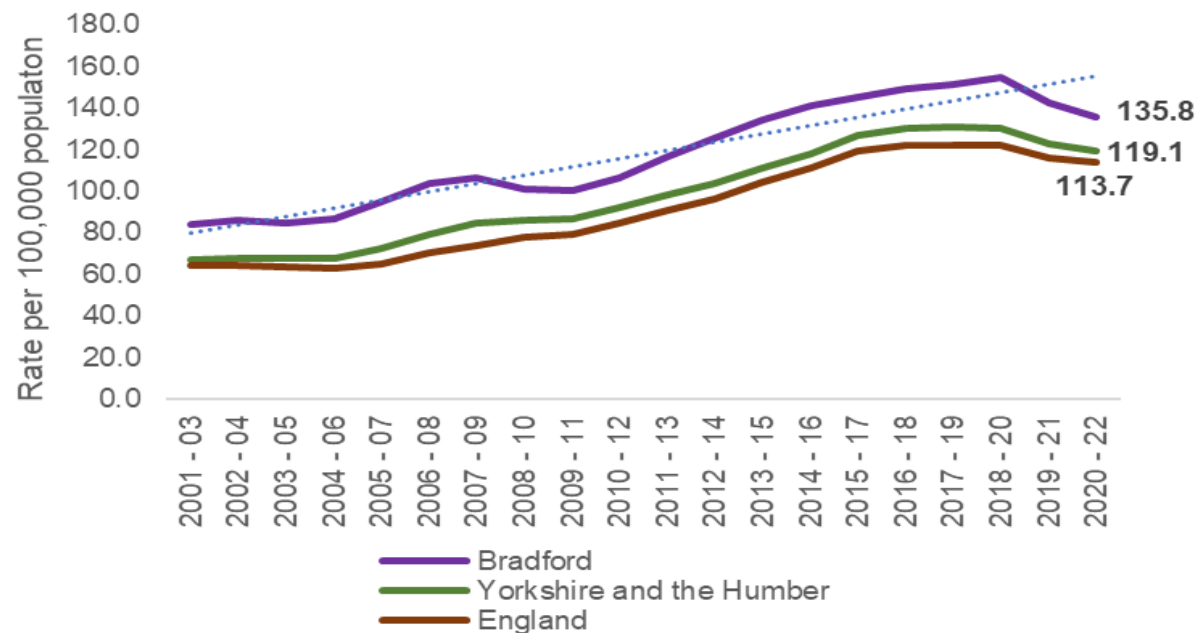

The district had a lower rate per 100,000 population compared to England (12.3) and Yorkshire and the Humber rate (10.7). Bradford had the 5th lowest mortality rate in Yorkshire and the Humber

City of
BRADFORD
METROPOLITAN DISTRICT COUNCIL

Mortality rate from Dementia and Alzheimer's disease (all ages) 2020-22

Mortality rate from dementia and Alzheimer's disease, all ages	Bradford			Region		England	
	Count	%	Rate	%	Rate	%	Rate
Female	1109	64.0%	140.8	64.7%	125.9	65.3%	121.0
Male	623	36.0%	123.8	35.3%	106.9	34.7%	100.6
Total	1732		135.8		119.1		113.7

The mortality rate for females is higher than males and this is in line with regional and England mortality rates.

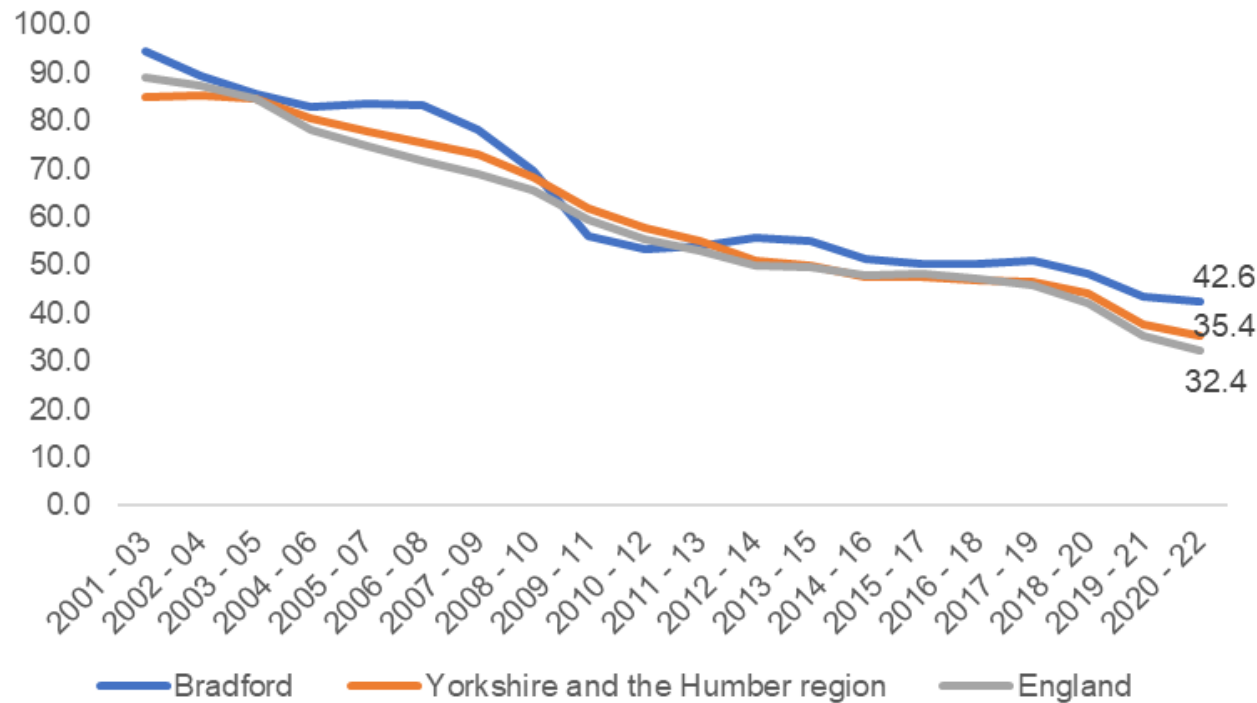

Whilst a similar trend to the region and England the district's 135.8 per 100,000 population mortality rate from dementia and Alzheimer's disease is higher than Yorkshire and the Humber (119.1) and England (113.7)

Bradford had the 3rd highest mortality in Yorkshire and the Humber behind North East Lincolnshire (138.1) and Doncaster (137.5). The mortality rate within the region is between 101.1 (York) to 138.1 (North East Lincolnshire)

Data Source: Public health profiles - OHID (phe.org.uk)

Mortality rate from influenza and pneumonia, all ages 2020-22

The 2020-22 mortality rate from influenza and pneumonia for Bradford is 42.6 per 100,000 population and 2020-22 rate was the lowest reported since 2001-03. The highest reported mortality rate for the district was in 2001-03 at 94.6 per 100,000 population.

Whilst a similar trend to the region and England the district's 42.6 per 100,000 population mortality rate from influenza and pneumonia is higher than Yorkshire and the Humber (35.4) and England (32.4)

Bradford had the 2nd highest mortality in Yorkshire and the Humber behind Rotherham (55.8). The lowest mortality rate within the region was York (27.1)
